

PRODUCT DATA

PETROFANTOM® Oil recovery Fluid

DESCRIPTION

PETROFANTOM® is a complex oil recovery fluid which encapsulates Oil entrapped in small pores of mature oil fields improving oil mobility. Product has low adsorption in the rock surface of reservoir to ensure that small amounts will be effective throughout the porous media.

SPECIFICATION PROPERTIES

FORM	Amber suspension
Density @ 20°C	0.97- 0.98 kg/l
Flash point, TCC	>140 °F
Viscosity @ 25°C	20-30 cp
pH	8.0-8.5
Solubility	Water dispersible Brine dispersible Oil soluble

APPLICATION METHODS

PETROFANTOM® is recommended for Enhanced oil Recovery in sandstone formations and limestone formations as well.

HANDLING PRECAUTIONS

Refer to the MSDS on this product for information regarding safety precautions relative to physical exposure and health hazards.
